Just for you. Track your journeys in this well-known route and take on your friends, with a City network! Whether you need a break on the way to work, heading back home from work, or making a special journey at. A sample conversation, assuming you have saved the file to the "%USERPROFILE%\my documents\sources\Steam\SteamAI\conversation" folder. (Double clicking the folder will automatically launch the application.) Also: Downloads Resolution requirement Download Migrate to a new game Conversation Sample File organization Conversation files There is a folder named "Conversation" at the root of the download with many files that describe a single conversation, among which are the various sub-files that describe a single "turn". I encourage everyone to create their own folder and create your own conversation files inside that folder. See Localizations There is a folder named "Game\_data" at the root of the download that has a sub-folder for the default localizations. (This is because, in the Steam client, you can change the language for the game. This folder is used to store the various language specific files of the game.) The default localizations can be found in the main game folder. These files should be placed in the folder named for the language you wish to support in your game, e.g. "English.txt". Note: There is no need to use the Dutch version of the English language file. "english\_nl.txt". Licensing All files of the game are licensed under the GNU General Public License, version 3.0. This can be found in the "ReadMe" file at the root of the folder. This means that anyone can take the code, modify it and redistribute it. If you wish to do this, you should first ask for permission from me, and of course give me credit for the source. What's New in v 82137476af
